

# **About us the share Market**

The **Share Market** (or **Stock Market**) is a platform where people **buy and sell shares of companies**. A share represents **ownership** in a company. When you buy shares, you become a **part-owner** of that company.

**How It Works** 

**1.Companies List Shares** – To raise money, companies sell shares to the public through an **IPO (Initial Public Offering)**.

2.Investors Buy & Sell – These shares are traded on stock exchanges like BSE, NSE (India) or NYSE, NASDAQ (USA).

# What is share Market

The Share Market (also called the Stock Market) is a place where people buy and sell shares (ownership units) of companies.

When you buy a share, you become a part-owner of that company. If the company does well, the value of your shares can go up, and you may also earn a dividend (a portion of the company's profits). If the company doesn't do well, the value of your shares can go down.

Key Points about Share Market:

Shares/Stocks – Small units of ownership in a company.

Stock Exchange – The platform where shares are traded (e.g., NSE, BSE in India; NYSE, NASDAQ in the USA).

### Stock Types

### **Preference Shares**

Preferential treatment in receiving dividends and capital repayment if the company closes. Usually no voting rights.

### **Based on Risk/Returns**

Blue-Chip Stocks – Trusted, stable, reputed companies with steady returns.

Growth Stocks – Companies expected to grow fast; reinvest profits instead of giving dividends.

In the **stock market**, there are different **types of stocks (shares)** based on **ownership**, **risk**, **returns**, **and voting rights**.

### Investment Strategies

n the **stock market**, success depends a lot on the **investment strategy** you follow. Different strategies suit different goals, risk levels, and timeframes.

#### **Long-Term Investing (Buy & Hold)**

Idea: Buy quality stocks and hold them for years.

Who uses it: Investors looking for wealth creation &

compounding.

Example: Buying Reliance, Infosys, Apple, Microsoft and holding for 10+ years.

#### **Value Investing**

Idea: Find undervalued stocks (price is lower than true

worth).

**Inspired by: Warren Buffett.** 

Goal: Buy cheap, sell when value is recognized.
